Hoist Neptune Series Completely Redesigned for 2010!

Hoist Liftruck Manufacturing is reintroducing the Neptune line of marina lift trucks with an all new modular design. While retaining all the features and proven performance Hoist customers have come to expect, the new modular design provides Hoist customers additional benefits.

- Easily removable bolt-on modules allow for greater serviceability and greater design flexibility.
- Hydraulics and fuel tanks are easily unbolted, allowing for thorough cleaning and replacement if necessary.
- Removable fenders and stairs are easily replaced in the event they are damaged, without comprising the structural integrity of the truck.

Bolt-on modules such as the cast counterweight also reduce the burdens of shipping. Customers benefit from saving on transportation costs realized by eliminating any special permitting requirements for domestic shipping. Additionally, the new Neptune Series can be easily broken down and containerized for the most cost-effective shipping anywhere in the world!

What hasn't changed is Hoist's commitment to providing trucks with:

- The most comprehensive standard features in the industry such as complete corrosion/galvanizing package on all units
- The most innovative features such as the improved extruded fork covering system with easily replaceable 4' sections
- The latest technology such as the Hoist RemoteTech System with email notification
- Parts commonality allowing for unparalleled service and support

All backed by a company with over 100 years experience in heavy lifting applications!

Come see the all new Hoist Neptune series at the [2010 Miami International Boat Show!](#) February 11-15 Booth 3409.

The Neptune Series will handle your boats with care, style and class!

Hoist products - Made with Pride in the USA
